

Java

```
class Solution {  
    public int totalFruit(int[] fruits) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[]} fruits  
 * @return {number}  
 */  
var totalFruit = function(fruits) {  
  
};
```

C++

```
class Solution {  
public:  
    int totalFruit(vector<int>& fruits) {  
  
    }  
};
```
